R & D Centre: Software Technology Park, NSIC-TBI  
Okhla, New Delhi - 110 020

## Works

- :: Works with standard specifications, classified to Categories/ Sub Heads.
- :: Provision for editing Rates and Specifications for individual Projects.
- :: Provision to change Measurements and Units.
- :: Provision to add new works.

## Rate Analysis

- :: Material, labour and machinery requirements for each work and its rates.
- :: Material, labour and machinery rates can be set in a common screen.
- :: Unit wise cost and split up cost can be extracted.
- :: Provision for changing rates and coefficients for individual project

## Schedule of Quantities

- :: Detailed Estimate with dimensions of each work in a project.

## Abstract Estimates

- :: You can make Estimates on Actual cost, Market Rate and Confidential rates.
- :: Split up of material, labour and machinery cost.

## Bill of Quantities

- :: With detailed specifications and provision for entering rates for quote.

## Summary

- :: Item wise summary of estimate without specifications.

## Floor Totals

- :: Floor level summary of estimate.

## Material Estimates

- :: This gives you the exact idea about the materials needed for each item of work in a project.
- :: Material wise and item wise report.

## Labour Estimates

- :: This gives you the exact details of Labour needed for each Item.
- :: Labour wise and item wise report.

## Project Rate Analysis

- :: Split up of cost into materials, labours, machines, etc.
- :: Unit cost and actual cost based on quantity is arrived.

## Schedule of Bars

- :: Structure wise.
- :: Bar wise.
- :: Summary.

## Tendering

- :: Tender Creation – You can make tender documents by splitting the estimate into various heads – civil works, electrification, plumbing, air conditioning etc. and issue to selected contractors.
- :: Tender Receipts – Provision for entering quoted rates of contractors for comparison, negotiation, adjusting and finalization.
- :: Work Order - Provision for selecting a contractor for a tender and issuing the work order.

ID	Description	Quantity	Unit	Rate	Amount
101	TOILETMENT	300	Sq	3.99	1197
101	SAND	0.44	cum	500	220
101	STONE BALLAST 20 MM	0.89	cum	1050	934

  

ID	Description	Quantity	Unit	Wage	Amount
10000	MASON	0.1	Lack	190	19
110000	HELPER	1	day	170	170
110010	HELPER FEMALE	1.4	day	150	210

  

ID	Description	Quantity	Unit	Rate	Amount

## Measurement Book

- :: Date wise or weekly measurement for sites entered by site engineers that can be used in bills.

## Cost Control

- :: Consumption of materials, labour and machinery can be recorded and compared with expected figures.

## Cost Abstract

- :: Summary of actual cost which can be separated to Total Cost, Cost per Square Meter, Percentage Cost and Section wise Cost.

## Comparison of Estimates vs. Actual

- :: This helps you to check item wise consumption of material, Labour etc. which are very useful for management decisions and Cost Control.

## Contractor's & Subcontractor's Billing

- :: Measurement wise bills with previous quantities and payments.
- :: Up to date, already billed and balance quantities and payments.

## Labour Billing

- :: Additional bills including labour wages etc.

## Purchase Request

- :: Material requests from sites by site engineer.

## Purchase Order

- :: Compare material requests with estimated quantities and processed for order.

## Reception of Materials

- :: Reception of materials on site.
- Data Dictionary
- :: Data dictionary is provided for Clients, Contractors, Suppliers, Materials, Labours, Machineries, etc.

## Contractor Lists

- :: Here we can maintain a list of approved contractors and their up to date item rates or labour rates.

## Supplier Lists

- :: Here we can maintain a list of approved suppliers and their up to date price list.
